

# RRT-6UVME-SATA-DVD-R 6U VME SATA DVD with Removable Drive Module

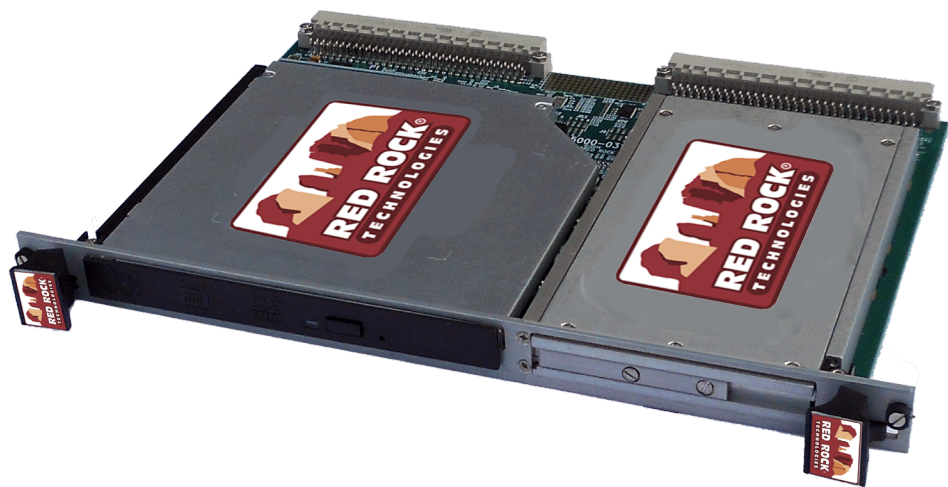

THE 6U VME SATA DVD WITH REMOVABLE DRIVE MODULE adds a removable HDD or SSD and a DVD to a VME system using one VME slot. The drive and DVD each have separate SATA interfaces.

The drive module can easily be removed from the VME system without removing the VME board. The connectors between the drive module and carrier are rated for 100,000 mating cycles to support frequent insertions/removals.

The drive module can use any COTS 2.5" SATA Hard Disk Drive (HDD) or Solid State Drive (SSD) providing capacities up to 16 TB and sustained transfer rates up to 200 MB/S. Options for discrete, controlled secure erase.

The DVD is a standard slim DVD tray loading version. Modes of operation: DVD-ROM, DVD-R/W, CD-ROM, CD-R/W.
