## XPedite7650

The XPedite7650 is an enhanced, Type 7 COM Express® module based on the Intel® Xeon® D-1500 family processors (formerly Broadwell-DE). COM Express® provides a standards-based form factor to bring PC processing to a wide range of applications. The XPedite7650 is ideal for the high-bandwidth and processing-intensive requirements of today's commercial, industrial, and military applications. The small footprint and standards-based form factor make the XPedite7650 perfect for portable and rugged environments, while providing an upgrade path for the future.

The XPedite7650 accommodates up to 32 GB of DDR4-2133 ECC SDRAM in two channels to support memory-intensive applications. The XPedite7650 also hosts numerous I/O ports and interfaces, including 10 Gigabit Ethernet, Gigabit Ethernet, PCI Express, SATA, USB 3.0, LPC, SMB, I<sup>2</sup>C, and LVTTTL serial.

Wind River VxWorks and X-ES Enterprise Linux Support Packages (XEL) are available. The XPedite7670 uses coreboot, powered by Intel®'s Firmware Support Package (FSP), to provide fast boot times and significantly simplify code traceability over legacy BIOS implementations.
